Objective

Data Science graduate student at IIIT Lucknow with a strong foundation in mathematics, statistics, and computing. Specializing in machine learning, deep learning, and predictive analytics with applications in finance, economics, and climate resilience. Passionate about building scalable AI systems to address high-impact, real-world challenges.

Education

Indian Institute of Information Technology, Lucknow Ongoing

M.Sc. in Data Science — CGPA: 8.2/10

Key Modules: Machine Learning, Deep Learning, Data Structures and Algorithms, Advanced Statistics

Achievements: JAM 2024 (Statistics), AIR 173; TOEFL: 108/120 (June 2024)

Institute of Mathematics and Applications 2023

B.Sc. in Mathematics and Computing — CGPA: 7.10/10

Delhi Public School, Ruby Park 2018–2020

Class 12 CBSE (2020): 92.6% — Class 10 CBSE (2018): 92.6%

Technical Skills

- **Programming:** Python, C, Binary
- **Machine Learning:** Scikit-learn, XGBoost, PyCaret, TensorFlow, PyTorch, Statsmodels
- **Data Analysis & Visualization:** NumPy, Pandas, Matplotlib, Seaborn, Plotly, Tableau, Power BI
- **Big Data & Pipelines:** Apache Spark (PySpark), Hadoop, Hive, Kafka, Dask
- **Databases:** SQL, PostgreSQL, MongoDB
- **Deployment & Tools:** Git, Docker, Streamlit, Flask
- **Finance & Quantitative Modeling:** Time-series forecasting, Risk modeling, Financial sentiment analysis, Monte Carlo simulation, SHAP analysis

Soft Skills

- Communication – clear articulation of complex technical concepts
- Teamwork – successful collaboration with interdisciplinary teams
- Problem-solving – strong analytical thinking and structured reasoning
- Adaptability – quick learner in dynamic, high-pressure environments
- Attention to Detail – rigorous approach to coding, analysis, and documentation
- Leadership – mentoring peers and assisting in course development
- Time Management – effectively balancing multiple academic and research priorities

- Critical Thinking – evaluating data-driven insights and methodologies
- Creativity – innovative thinking in modeling and solution development

Work Experience

AI Engineer Intern – INAI World

Jul 2025 – Present

Contributing to AI/ML engineering for large-scale LLM development; managing teams on model development.

Data Science Intern – RM Agrico Pvt. Ltd.

Jul 2025 – Present

Developing predictive data analysis systems for environmental intelligence (details under NDA).

Teaching Assistant – Probability and Statistics

Aug 2024 – Present

Indian Institute of Information Technology, Lucknow

- Assisted in delivering undergraduate and postgraduate courses
- Evaluated assignments, quizzes, and examinations
- Supported enhancements to course material and structure

Volunteer – Climate Resilience Observatory

Jan 2025 – Present

Supporting data-driven initiatives for climate risk prediction and resilience planning.

Projects

Detection of Distress Signals for Women's Safety — Built an image-processing model to detect emergency gestures with 91% accuracy.

Stock Movement Predictor (Reddit Sentiment) — NLP + deep learning pipeline achieving $R^2 = 0.95$ for market trend prediction.

ESG-Oracle — Forecasted country-level ESG scores for 2025–2026 with RNN/LSTM (R^2 up to 0.951) and synthetic data generation via CVAE.

Global Conflict Currency Stress Prediction — ML pipeline combining Ridge, XGBoost ($F1 = 0.83$), and RNN to forecast FX stress from macroeconomic and geopolitical data, with SHAP interpretability.

Agent-Based Socioeconomic Collapse Simulator — Modular simulator modeling GDP, inflation, inequality, and unrest under shock scenarios; interactive Streamlit dashboard.

Fractal-Based Data Analysis Library — Ongoing MSc capstone project and thesis; Python library for fractal-based feature extraction and multiscale data analysis.

Dissertation – Poverty, Inequality, and Corruption — Statistical study on socio-economic interdependencies.

Publications and Conferences

Presented: Statistical Analysis of War and Post-War Economics – 49th OMS Conference, 2022

Other Interests

Reading, Photography, Video Games, Personal Fitness
